

AP-500H-MNTD2 Mount Kit

Installation Guide

The Aruba AP-500H-MNTD2 is a stand-alone desk mount for the 500H Series access points.

Package Contents

- Mount Stand
- (x2) M2.6x0.45x8 Pan Head Phillips Screws
- (x2) M2.6x0.45x8 Pan Head T8H Torx Screws

This mount kit includes two sets of screws - regular Phillips screws and tamper-proof Torx screws. You can choose whichever set of screws you prefer to secure the mount stand to the access point.

Installation

1. Insert the Ethernet jumper cable to the E0 port on the back of the access point. This Ethernet jumper cable is pre-installed on the mount stand. See [Figure 1](#).
2. Align the keyholes on the back of the access point to the corresponding posts on the inside of the mount stand. Press the access point into the mount stand, then slide the access point down until the posts engage with the keyholes. See [Figure 1](#) and [Figure 2](#).
